

Project Governance Checklist

Before reaching out about a PMO & Project Management engagement, review these points. They help us quickly understand where your project stands today and what governance is missing.

About the project's current state

- ☐ The project has an approved budget.
- ☐ Multiple vendors or contractors are involved.
- ☐ There's no real weekly governance today over progress, risk, and budget.
- ☐ A schedule exists, but without a clear critical path.

About the team and urgency

- ☐ An internal team is already working on the project (we're not starting from zero).
- ☐ We need risk visibility before issues become costly to fix.
